

Lantegi Batuak - Introduction of Practices

LAN ESKOLA - Is it possible to learn in a different way?

Let's talk about Lan Eskola, the professionalization space for people with disabilities, where the learning process is based on the person.

Lan Eskola is the educational project of Lantegi Batuak, that aims to improve the employability of people with disabilities in a very particular way and with a clear philosophy. The focus of Lan Eskola is the individual as a whole, and for that reason, the didactic formula includes technical, transversal and practical training.

The key factors of Lan Eskola are creativity, innovation, continuous improvement and individualized support. This way of working helps us eliminate barriers and ensure cognitive accessibility. The methodologies that we use include Project and Service Based Learning, gamification, learning by doing, etc. We also believe in certified training as an added value that can help people with disabilities enter the labor market.

The main goal of the project is enabling people with disabilities to acquire competencies and skills which will allow them to lead a satisfactory and autonomous adult life in their personal, social and professional spheres.

If you want to know more about Lan Eskola, please go to (page 167):
